The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/572,550	Applicant(s) NOZAKI ET AL.	
	Examiner JAMES S. HOGAN	Art Unit 3752	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 6 rejected under 35 U.S.C. 102(b) as being anticipated by German Patent No. DE19956830 to Gottlieb et al.

3. As per claims 1-4, Gottlieb et al discloses (See Figure 9)a fuel injection valve having a nozzle needle (2) inserted into a guide hole (not numbered), where the nozzle need and the guide hole form a gap(H) that has a tapered shape that widens towards the nozzle holder (1) of the valve.

4. As per claims 2 -4 the entire gap has a linear tapered shape that widens towards the nozzle holder (1)/

5. As per claim 6, the gape has a tapered shape as a result of a tapered portion (3) formed on the nozzle needle.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3752

7. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over German Patent No. DE19956830 to Gottlieb et al. in view of U.S. Patent No. 4,583,687 to Gaskell.

8. The rejection of claim 1 above serves as the basis for the following. Gottlieb et al does not teach a tapered guide hole. Gaskell teaches a tapered surface (11a) of a guide hole for a nozzle member (17). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the injector of Gottlieb et al with the tapered guide wall as taught by Gaskell in order to supply a tapered valve needle with a corresponding surface.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is as follows

U.S. Patent No. 7,367,517 to Tojo et al

U.S. Patent Application No. 2004/0124286 to Schorr et al

U.S. Patent No. 7,066,397 to Astachow et al
